Deliverable dwellings:

Developable dwellings:

Summary

The developable area of the site is greenfield land (the developable area excludes the farmhouse and its curtilage) which is located to the south west of Church Broughton. The site has potential access onto Cote Botttom Lane and Tippers Lane. We have estimated a site capacity of 45 dwellings. There is no developer interest in the site.

The site is considered to be potentially suitable as it currently restricted by local planning policy as the site is in an area protected by countryside policy. A small part of the site is located within Flood Zone 3a and this element would require a sequential test.

The site is considered available as the existing use would not need to be relocated and the site is in one ownership. The site is considered achievable as it is green field in nature and there is a reasonable prospect that the site will be financially viable for residential development in the future.
